

## **Software Engineering - Statistics Product Backlog**

1. As a site member, I want to be able to view different, useful statistics for various data, so that I can make the best decision for me.
2. As a web manager, I want to be able to feed the code that the statistics team wrote and get a .svg file in return, so that I can post/use it on the website.
3. As a project member, I want to be able to view the statistics mentioned above, so that I know how to improve the product.
